

SMARTBOX EQUIPMENT

ABOUT US

"Smartbox LLC", founded in 2017 in Georgia, is a young but dynamically developing company specializing in the rental of earthmoving equipment. Despite its relatively young age, the company boasts an impressive fleet of equipment from the world-renowned manufacturer Caterpillar.

At "Smartbox LLC," great importance is placed on studying and satisfying customer needs, aiming to respond promptly and efficiently to their requests. This underscores their commitment to quality service and customer orientation.

The main advantages of "Smartbox LLC" include:

High-Quality Equipment from Caterpillar:

The company uses machinery from the leading manufacturer, ensuring reliability and efficiency in operation.

Excellent Condition of Equipment:

Regular maintenance and thorough inspection guarantee high quality and safety of the equipment.

Professional Operators:

Experienced specialists capable of effectively managing the machinery and solving various complex tasks.

Technical Support from Caterpillar:

Continuous support from the manufacturer ensures prompt resolution of any technical issues.

Individual Approach to Each Client:

A personalized approach to each client, allowing for maximum consideration of their unique needs.

Quick Availability of Equipment:

Efficient logistics and work organization ensure fast access to the necessary equipment.

"Smartbox" provides transportation services for oversized equipment throughout Georgia.

Dear partners,

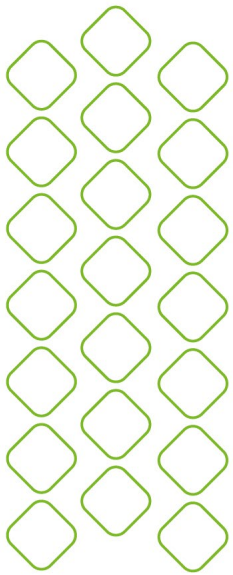

We are proud to offer you our earthmoving equipment, combining reliability and high efficiency. Our work's priority is an individual approach to each client, aiming to provide equipment that meets quality standards. Our team of professionals is always ready to offer you expert support and solutions aimed at achieving your business goals.

Excellence in Machinery: Distinctive Features of Caterpillar Machines from Smartbox LLC.

Caterpillar machinery, designed to operate in harsh conditions, is characterized by high performance, reliability, and cost-effectiveness in operation. These machines, a product of advanced engineering, offer efficient solutions for a variety of tasks. **They provide optimal efficiency, reducing operational costs, making them a valuable asset for achieving business objectives.**

Collaboration with leading construction companies and the use of Caterpillar equipment allow "Smartbox LLC" **to guarantee high efficiency and reliability throughout all construction stages.** This highlights their commitment to quality and innovation in projects across Georgia.

Excavators with Bucket

Model	Operating Weight	Bucket Capacity	Ground Reach/ Loading Height
CAT 320DL	21 500 Kg	1,2 CUM	9,7 m / 6,5 m
CAT 324DL	25 500 Kg	1,5 CUM	9,6 m / 6,5 m
CAT 329DL	29 500 kg	1,8 CUM	9,6 m / 6,5 m
CAT 330DL	36 000 kg	2,0 CUM	9,6 m / 6,5 m

SPARE PARTS

"Smartbox" specializes in selling spare parts for construction equipment. We offer a wide range of different spare parts that will help maintain your construction equipment in excellent condition. Our experienced staff is always ready to help you to select the necessary parts and ensure fast delivery at competitive prices.

OUR PROJECTS

"Smartbox" – your reliable partner in construction. Our company has extensive experience of successful collaboration with various construction companies, providing reliable and efficient equipment for the most complex projects.

Collaboration with Sinohidro
in the construction of the highway in Khashuri
and the road from Akhaltsikhe to Batumi-Hulo.

We take pride in our achievements in collaboration with Sinohidro in the construction of the highway in Khashuri and the road from Akhaltsikhe to Batumi-Hulo. Heavy construction equipment from "Smartbox" has been actively involved in these projects, ensuring high productivity and safety.

Working with the Turkish construction company
"Synergy" for the construction of the cascade
HPP "Lahami 1" and "Lahami 2" in Svaneti.

Our experience working with the Turkish construction company "Synergy" for the construction of the cascade HPP "Lahami 1" and "Lahami 2" in Svaneti confirms our ability to provide reliable equipment for large infrastructure projects.

In addition, "Smartbox" has been involved in projects with Macro Construction for the construction of a hotel in Tbilisi, as well as with the Chinese construction company "China State Construction Engineering Corporation Limited" for the construction of a highway in Rikoti.

Our collaboration with China Railway 23rd Bureau Group Georgia North-South Corridor in the construction of tunnels and roads in Kvasheti-Kobi underscores our ability to provide high-quality equipment and professional service for the most challenging projects.

"Smartbox" – your reliable partner in construction,
ready to support you in the realization of your projects.
